R f values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the ...

Gideon Emmet Moore (1842–1895) was Editor of the second volume of JACS.. As we discover in his obituary, “Depth, care, thoroughness, and method characterized his work....He at one time wrote much and all of it was valuable; in the early days making many contributions to mineral chemistry: Brushite, Cryptocallite and Hetaerolite being additions made by him to the list of new species.”
