Wants - Simply the desires of citizens. Wants are different from needs as we will see below. Wants are a means of expressing a perceived need. Wants are broader than needs. Needs: These are basic requirements for survival like food and water and shelter. In recent years we have seen a perceived shift of certain items from wants to needs.

In microeconomics, supply and demand is an economic model of price determination in a market. It postulates that, holding all else equal, in a competitive market, the unit price for a particular good, or other traded item such as labor or liquid financial assets, will vary until it settles at a point where the quantity demanded (at the current price) will equal the quantity supplied (at the ...

The Three Factors of Production. One of the central characteristics of this course is its focus on land as a distinctive factor of production, which must be considered separately from the other two factors, capital and labor. This is a point that modern-day economics de-emphasizes, or even denies outright.
