An embryonic cell divides again and again. Where there was one cell there are two, then four, then eight,... Each holds all the genetic information needed to create a human being.

A Science Odyssey: You Try It: DNA Workshop - PBS

A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

People sleep peaceably in their beds at night only because rough men stand ready to do violence on their behalf. --- George Orwell. I am therefore of the opinion that when a democratic people engages in a war after a long peace, it incurs much more risk of defeat than any other nation; but it ought not easily to be cast down by its reverses, for the chances of success for such an army are ...
