FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Environmental Ethics. The field of environmental ethics concerns human beings' ethical relationship with the natural environment. While numerous philosophers have written on this topic throughout history, environmental ethics only developed into a specific philosophical discipline in the 1970s. This emergence was no doubt due to the increasing awareness in the 1960s of the effects that ...
