Outlook 2003 Question Answer

iCalendar is a great general-purpose solution, and the DDay.iCal library is a great way to do this from .NET, but I believe Exchange Web Services (EWS) are a better solution in the context of the original question (Exchange, C#/.NET).. And if you're using a .NET language such as C#, you should use the EWS Managed API wrapper which greatly simplifies working with EWS.
