### **Pearson Chapter 17 Chemistry Section**

Honesty On each exam day I am going to give you two examinations, one in chemistry and one in honesty. I hope you will pass them both, but if you must fail one, let it be chemistry, for there are many good people in this world today who cannot pass an examination in chemistry, but there are no good people in the world who cannot pass an examination in honesty.

Polonium is a chemical element with symbol Po and atomic number 84. A rare and highly radioactive metal with no stable isotopes, polonium is chemically similar to selenium and tellurium, though its metallic character resembles that of its horizontal neighbors in the periodic table: thallium, lead, and bismuth. Due to the short half-life of all its isotopes, its natural occurrence is limited to ...

Electronic structure. Singlet oxygen refers to one of two singlet electronic excited states. The two singlet states are denoted  $1 \Sigma^+ g$  and  $1 \Delta g$  (the preceding superscripted "1" indicates it as a singlet state). The singlet states of oxygen are 158 and 95 kilojoules per mole higher in energy than the triplet ground state of oxygen. Under most common laboratory conditions, the higher energy ...

Deep-fat frying can be defined as a process of cooking food by immersing them in edible oil at a temperature above the boiling point of water, and therefore, may be classified as a dehydration process (Farkas, 1994). Frying temperatures usually range between 130 and 190 °C, but most common frying temperatures are in the 170–190 °C range. Deep-fat frying is a complex unit operation ...
