The Calculus Lifesaver: All the Tools You Need to Excel at Calculus. by Adrian Banner. Review: Lengthy yet vital, this resource book is jam packed with straight-forward explanations and loads of solved problems for students to easily learn from. Excelling many of its contemporaries by leaps and bounds, The Calculus Lifesaver truly lives up to its title.

In mathematics, a series is, roughly speaking, a description of the operation of adding infinitely many quantities, one after the other, to a given starting quantity. The study of series is a major part of calculus and its generalization, mathematical analysis. Series are used in most areas of mathematics, even for studying finite structures (such as in combinatorics), through generating functions.

(Guest post by Raffael Stenzel). This post is a sequel to the discussion of the mysterious nature of right properness and its understanding as an instance of coherence problems for presenting $(\infty, 1)$ $(\infty, 1)$ -categorical structure. The last post discussed a relation between right properness of a model category \mathcal{M} and locally cartesian closedness of the underlying $(\infty, 1)$...

In this paper, we address the problem of generating person images conditioned on both pose and appearance information. Specifically, given an image x_a of a person and a target pose $P(x_b)$, extracted from a different image x_b , we synthesize a new image of that person in pose $P(x_b)$, while preserving the visual details in x_a .
